SUBJECT INDEX

Attenuation lengths
Photoelectron attenuation lengths and thermal broadening in GaAs (110) 211

Ba
X-ray photoelectron spectroscopy study of Sr and Ba compounds 217
Boron trifluoride
A UV photoelectron spectroscopic study of addition compounds of boron trifluoride with methyl-substituted pyridines 105
1-Bromo-2-iodo-ethane
HeI photoelectron spectrum of 1-bromo-2-iodoethane 303

Carbonyl compounds
Effects of relaxation and hyperconjugation on shake-up transitions in X-ray excited photoelectron spectra of some small carbonyl compounds 313
Core electron binding energies
Calculation of core electron binding energies from structural formulas 1
Coster–Kronig decay
Super Coster–Kronig versus Coster–Kronig decay after 4d excitation/ionisation in Gd—a synchrotron radiation study 365
Cylindrical mirror analyzer resolution
Dependence of cylindrical mirror analyzer resolution on the geometry of the measurement 13

Electron spectrometer transmission functions
Electron spectrometer transmission functions for quantitative AES and XPS 353

GaAs (110)
Photoelectron attenuation lengths and thermal broadening in GaAs (110) 211
Gd
Super Coster–Kronig versus Coster–Kronig decay after 4d excitation/ionisation in Gd—a synchrotron radiation study 365

H_2S
The high resolution inner-valence photoelectron spectrum of H_2S induced by monochromatic Al $K\alpha$ X-rays 241
Hydrocarbons
The use of 2s-derived molecular orbitals in identifying surface hydrocarbons using photoelectron spectroscopy 341
Hyperconjugation
Effects of relaxation and hyperconjugation on shake-up transitions in X-ray excited photoelectron spectra of some small carbonyl compounds 313

Iodine
Iodine incorporation into polymeric films investigated by angle-resolved XPS 203

Methanol
Methanol: a critical test of intensity models for molecular soft X-ray emission 259
Methyl-substituted pyridines
A UV photoelectron spectroscopic study of addition compounds of boron trifluoride with methyl-substituted pyridines 105

NEWDTP 2.2
NEWDTP 2.2: a versatile system for routine XPS data acquisition and analysis 189
Nitroxyl radicals
Electronic structure of nitroxyl radicals determined by means of photoelectron spectroscopy 73

Orientation vibrations
Orientation vibrations in two-dimensional dipole systems 373
Oxygen-containing free molecules
X-ray excited photoelectron spectra of free molecules containing oxygen 117

P_4O_{10}
Electronic structures of phosphorus oxide P_4O_{10} and phosphorus sulfides P_4S_{10} and P_4S_7 51
P_4S_{10}
Electronic structures of phosphorus oxide P_4O_{10} and phosphorus sulfides P_4S_{10} and P_4S_7 51

P_4S_7
Electronic structures of phosphorus oxide P_4O_{10} and phosphorus sulfides P_4S_{10} and P_4S_7
Phosphorus
Auger parameters and relaxation energies of phosphorus in solid compounds 381
Polymeric films
Iodine incorporation into polymeric films investigated by angle-resolved XPS 203
Proton affinities
A critical investigation of XPS predicted proton affinities 167

Relaxation
Effects of relaxation and hyperconjugation on shake-up transitions in X-ray excited photoelectron spectra of some small carbonyl compounds 313

2s-derived molecular orbitals
The use of 2s-derived molecular orbitals in identifying surface hydrocarbons using photoelectron spectroscopy 341
Silver compounds
XPS core level spectra and Auger parameters for some silver compounds 273
Sr
X-ray photoelectron spectroscopy study of Sr and Ba compounds 217
Sulphur compounds
The effect of d density on the Kα line shift in sulphur compounds 297
Super Coster–Kronig decay
Super Coster–Kronig versus Coster–Kronig decay after 4d excitation/ionisation in Gd—a synchrotron radiation study 365

Thermal broadening
Photoelectron attenuation lengths and thermal broadening in GaAs (110) 211
(Ti, Al)N
The contribution of characteristic energy losses in the core-level X-ray photoelectron spectroscopy peaks of TiN and (Ti, Al)N studied by electron energy loss spectroscopy and X-ray photoelectron spectroscopy 85
TiN
The contribution of characteristic energy losses in the core-level X-ray photoelectron spectroscopy peaks of TiN and (Ti, Al)N studied by electron energy loss spectroscopy and X-ray photoelectron spectroscopy 85
TiO_2–V_2O_5 catalysts
XPS study of TiO_2–V_2O_5 catalysts 279

XPS surface analysis
Quantitative XPS surface analysis: correction for contamination layer 33
